

MOOSOMIN / SAULTEAUX FIRST NATION - COCHIN, SASKATCHEWAN

DATE: May 27th, 28th & 29th 2016

NAME: _____ **PHONE #:** _____ **EMAIL:** _____

DATES ATTENDING CLINIC:

Please indicate in spaces provided with an X, dates attending, shifts available and if you require a hotel and which nights. We request that anyone wanting to volunteer, can commit to at least a total of one full day; we reserve the right to decline any application. Availability is based on a first come, first serve basis.

FRI **MAY 27TH** _____ SHIFT 8am – noon* _____ 1-8 _____ *mostly setup

SAT **MAY 28TH** _____ SHIFT 8am – noon _____ 1-8 _____

SUN **MAY 29TH** _____ SHIFT 8am – noon _____ 1-6 _____

* Please ensure that you are available for the whole shift that you have indicated. If you are not available for the full shift, please indicate so and we will try our best to accommodate you.

Hotel needed for (dates/nights): _____

* CAP sets aside a block of hotel rooms for each clinic, and is given a special (reduced) rate, but this is at the expense of the participant, unless arrangements have been made with CAP staff, or funding becomes available.

Travelling Partner(s): _____

(We ask for this information to ensure you are scheduled together)

Please check one of the following:

VET STUDENT _____ Current year of study: _____

TECH STUDENT _____ Current year of study: _____

Are you currently also employed at a clinic? Yes _____ No _____

If yes, name of clinic _____

Dog handling experience: What is your experience? What types of dogs are you comfortable with?

*proper restraint and moving animals around is often a HUGE part of these clinics as many of these dogs are not used to it _____

Previous clinical experience: What jobs/tasks have you done (work or volunteer wise), in veterinary clinics before? _____

We will need students in the following areas: Please indicate which areas you would be willing to help out with (training provided, as well as direct supervision where and when needed):

- pre-surgical exams (working with a veterinarian)
- pre-medication (working with a tech, protocol and dosages are already established)
- induction/knock down (working with a tech, only if we do not have enough licensed people)
- recovery, post-op exams and deworming (working with a veterinarian)
- autoclave (as many surgeries as we do, there are that many surgical packs to clean and wrap)

Any additional comments? _____
