

Western College of Veterinary Medicine

Graduate Training in the Department of Veterinary Pathology

The Department of Veterinary Pathology at the Western College of Veterinary Medicine invites applications from academically qualified veterinarians for graduate study in anatomic, clinical, poultry, or wildlife pathology. The Department offers two different 3 year MSc programs, a traditional research based program and a new program designed to teach students diagnostic skills in addition to a research component. Diagnostic training may be in anatomic pathology with an emphasis in domestic animals, wildlife or poultry and in diagnostic clinical pathology. PhD degrees are also available. Scholarship support, beginning at approximately \$33,000 per year, is available on a competitive basis to veterinarians who are Canadian citizens or hold land immigrant status and have successfully passed the computer-based portion of the North American Veterinary Licensing Examination.

The application opens September 15, 2019 and the deadline is October 15, 2019 for receipt of all application documents. Application files must be complete by the deadline for inclusion in the competition. The complete list of application documents is available by contacting the Department Program Coordinator. Programs begin August 15, 2020. Individuals wishing to apply should contact:

Dr. Elemir Simko, Graduate Chair
